

# ORIM-PONTI PROJECT OFFICE

## R+D+i funding

Support activities for research into business funding for R+D+i activities through public subsidy calls in multiple modalities. Information, accompaniment and support in the processing of calls for grants and subsidies.

## Private funding

Support activities for the research of investors in business projects and their execution.

## Exploitation of intellectual property

Preparation of preliminary business models of the R+D results of the company or project and definition and implementation of exploitation plans according to the level of technological maturity.

## Valuation of intangible assets

Report according to the regulations that allow the quantification of the potential income from the marketing of an asset (tangible and/or intangible), with the aim of presenting the client with conclusions that allow a series of improvement actions to be undertaken according to the result provided in the report issued.

## Tax deductions

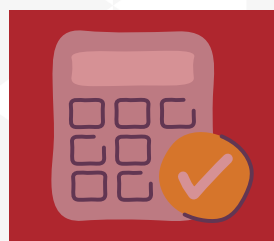

Tax incentive applicable to corporate income tax that allows a reduction in the tax base. It has the potential to generate up to 59% of R+D+i expenses.

## Research personnel

This is a non-tax incentive that allows a reduction of around 10% of the gross salary of the subsidised personnel.

## Caja de patentes o *patent box*

A tax incentive that allows income taxes to be reduced on the transfer of certain intangible assets created by the company, reducing 60% of the net income from this income.

## Communication plans

Positioning and definition of the communication strategy focused on the exploitation and/or transfer of the R+D results of the projects.
